

# ECHO REPORTS

**Pre 06/10/2020:** The echo reports will be available via echoc. To do this, you type in 'echoc' in internet explorer.

**Post 06/10/2020:** You may find these echo reports via ICM. You need to click on orders and find the echo request, then right-click and select view results. This should then come up with a dialog box and an icon. If you click on the icon, it should generate a pdf with the echo report.

**Peninsula Echo Reports:** Some echocardiograms may be done in the peninsula heart center. You will ideally need to know the month and date; the echo was performed. Reports of these can be found through g drive, cardiac medicine, and peninsula echo reports.

**Ultra Cardiac Echo:** You can find this through g drive, cardiac medicine, ultracardiac echo, echo reports, year, month, and date.
